

## Julian Picton KC

Call: 1988 | Silk: 2010

### Overview

Julian specialises in clinical negligence, personal injury, and professional indemnity claims. His clinical negligence work is primarily for claimants and principally comprises high value claims for birth related injuries and in particular cerebral palsy. Julian's personal injury practice concentrates on acquired brain and catastrophic injury claims of maximum severity. In the professional indemnity sphere, Julian frequently acts for or against lawyers, accountants, surveyors, and financial advisers and advises on coverage issues.

Given Julian's main areas of practice, he has special expertise in professional negligence claims arising out of mishandled personal injury and clinical negligence litigation. This is where his specialist knowledge is a particular advantage. Julian also takes a keen interest in all difficult damages issues and the quantification of loss.

---

### Medical law

Since taking Silk in 2010, clinical negligence claims have become an increasingly large proportion of Julian's practice. His clinical negligence work is primarily, but not exclusively, for claimants and comprises predominantly claims for birth related injuries and in particular cerebral palsy.

Julian's first case in Silk was on behalf of a brain damaged infant in which he successfully overcame a defence of Plene Administravit advanced by one of the Defence Unions on behalf of the estate of a deceased general practitioner.

Current examples of Julian's clinical negligence practice include:

- Leading Jane Tracy Forster, Julian advantageously settled an extremely complex claim on behalf of the infant claimant for very severe brain injury allegedly attributable to an undetected tension pneumothorax occurring as a result of intermittent positive pressure ventilation (IIPV) administered in the

first 5 minutes of life

- Julian is instructed for the claimant, who has cerebral palsy, in an ongoing liability dispute concerning the standard of care in the conduct of ultrasound scanning and the alleged failure by the Maternity Unit to diagnose severe Intra Uterine Growth Retardation
- Julian recently settled a quantum only cerebral palsy claim on behalf of the claimant for a figure comprising periodical payments and a lump sum together exceeding £6 million
- Julian is in the early stages of advising the claimant, born asphyxiated with meconium aspiration, on the merits of proceedings claiming damages for alleged negligence on the part of the midwives for failure to undertake continuous CTG monitoring

---

## Personal injury

Julian represented the defendant solicitor in *Hickman v. Blake Lapthorne and Another* [2005] EWHC 2714; [2006] P.N.L.R. 20, the leading authority on apportionment between solicitor and counsel arising from the negligent undersettlement of a personal injury claim.

Because of the other main limb of his practice, he places a particular emphasis on loss of a chance claims arising out of mishandled personal injury and clinical negligence litigation.

He is currently instructed on behalf one of the firms of solicitors involved in the range of disputes arising from management of the various *Miners Compensation Schemes*.

Julian concentrates on personal injury claims, with a particular emphasis on acquired brain and catastrophic injuries and fatal accidents. Complex quantification and medical issues are specialities.

He has an extensive practice, predominantly for defendants, and is regularly instructed by the major road traffic and employers' liability Insurers.

In the Court of Appeal, he recently obtained permission to appeal on the nature and extent of the duty owed by a tortfeasor to a victim sustaining nervous shock in the aftermath of a road traffic accident.

---

## Professional liability

Julian was heavily involved in the lender litigation which emerged at the end of the 1990s, representing all the defendant solicitors in claims brought by the Coventry Building Society. Together with Michael Pooles KC, he represented the successful appellant in *Lloyds Bank v. Crosse and Crosse* [2001] Lloyds LR PN 452, in which the Court of Appeal took the opportunity to restate the formulation of loss in lenders'

claims.

---

## Insurance

As part of both his professional indemnity and his personal injury practice, Julian is frequently called upon to advise on policy and coverage issues. He recently advised Insurers in relation to 800 after the event insurance policies, following the insolvency of the legal expense insurance funder.

---

## What others say

"He is astute, erudite and combines forensic attention to detail with a wonderful client manner." *Chambers UK, 2025*
